n.a. not available

(i) The sum of the components may differ from the totals in some instances due to rounding.

(ii) Data are subject to periodic revision as more updated information becomes available.

GLOSSARY

The following terminologies are defined in the context of Solomon Islands.

Balance of Payments (BoP): Records all payments and receipts relating to the movement of funds between a country and foreign countries.

Broad Money (M3): The total stock of money consisting of M1 and other deposits (time and savings) in the economy at a given time. (replaced Money Supply)

Capital account: Records international transactions relating to the flow of capital between a country and foreign countries, such as investment, loans etc.

Cash Reserve Requirement (CRR): A percentage of commercial banks' deposits liabilities that must be kept in cash or reserve at the Central Bank as minimum reserve requirement. (replaced Liquidity Asset Ratio)

Current account: Records international transactions relating to the flow of goods, services, income and gifts. A surplus indicates higher inflows than outflows and a deficit indicates the opposite.

Domestic credit: Value of loans and advances obtained from within the country.

Exchange rate: The price of foreign currencies stated in terms of the local currency or vice versa.

Excess Liquidity: Refers to liquidity that commercial banks holds after possessing the minimum reserve requirement prescribe by the Central Bank.

Exports: Goods that a country sells abroad.

External reserves: Stock of foreign currency assets of the Central Bank. These assets are earned through exports, foreign aid and loans obtained from institutions abroad.

Gross Domestic Product (GDP): Total value of all final goods and services produced in an economy during the course of a year.

Imports: Goods that a country buys from abroad.

Liquidity Asset Requirement: Usually defined as a percentage of deposit liabilities of a commercial bank that shall be held as cash or as balance with the Central Bank.

Money Supply: The total quantity of money in a country's economy at a particular time.

Narrow Money (M1): Component of money supply that comprises of currency outside depository corporations and demand deposits held with depository corporations.

National Consumer Price Index (NCPI): shows the weighted index of price level of consumer goods and services in Honiara, Auki, Gizo, and Noro over a month. This information forms the basis for calculating inflation in the country.

Net Credit to Government (NCG): Net value of government's deposits less its borrowing from the Banking sector.

Private Sector credit (PSC): Refers to financial resources (loans) provided by other depository corporations to the private sector (firms and households) within a country.

Trade balance: The difference between merchandise exports (goods sold overseas) and merchandise imports (goods purchased from overseas).

Trade surplus/deficit: A trade surplus is when the value of exports is higher than the value of imports, whilst a trade deficit is when receipts from exports are less than payments for imports.

CHAPTER I : OVERVIEW AND ANALYSIS

The global economy continues to recover from the pandemic and the war in Ukraine, however, headwinds such as inflation persisted. According to the IMF's world economic outlook for July 2023, global growth is projected to slow down slightly to 3% this year from an estimated 3.5% growth forecasted for 2022. Much of this drag can be traced to slower growth in advanced economies where 93 percent of economies were projected to have their growths lowered. On a positive note, growth in emerging market and developing economies remained broadly stable while energy and food prices declined from their pandemic-induced peaks.

Domestically, economic activity slowed as weaker than expected production outturns in key agricultural commodities faltered. The production index contracted in the second quarter by 1% to an index of 118, driven by weak performances in logs, fish and agricultural outturns, outweighing the gain in mining production. Conversely, activities in the manufacturing sector bounced back reflecting improved performance in goods manufactured for both exports and domestic consumptions. This resulted in a 38% growth in the manufacturing index over the quarter.

Conditions in the labour market mirrored weak economic activities with SINPF member contributions, a proxy for employment, growing negligibly by only 0.8%. Pay As You Earn (PAYE) tax in nominal terms, another partial indicator for employment, however, decreased by 4% to \$121 million in the June quarter while advertised vacancies conversely grew by 45%.

In terms of consumer prices, headline inflation for June eased to 4.3% from 8.2% in March reflecting falling prices in both the imported and domestic components of inflation. Imported inflation fell to 2.5% from 8.2% on account of falling fuel prices. Likewise, domestic inflation declined to 5% from 8.3%, owed to the slower rise in overall prices of food and tobacco. Core inflation slowed to 5.3% in June from 7.5% in March, indicating persistent underlying pressures in the economy.

Monetary conditions moderated in line with favourable balance of payment movements which resulted in key monetary aggregates recording positive movements during the quarter. Reserve money (M0), narrow money (M1), broad money (M3), liquidity and credit to private sector all posted growths in the quarter. The weighted average interest rates margin on the other hand, widened further during the quarter.

External conditions recorded a narrower deficit of \$44 million in the June quarter from \$269 million posted in the previous quarter. This improved outcome emanated from a 9% increase in exports and a 12% decline in imports. Accordingly, gross foreign reserves grew by 2% to \$5,582 million, sufficient to cover 11.4 months of imports of goods and services.

The fiscal position registered a wider deficit of 4% of GDP (or \$515 million) in June, reflecting higher expenditures against weak revenue collections. Total expenditure surged by 63% while revenue only improved by 2%. Meanwhile, total government's debt stock rose over the quarter by 5% to \$2,316 million, equivalent to 19% of GDP.

CHAPTER II. INTERNATIONAL DEVELOPMENTS

Global Output

Global growth recovery is anticipated to decline to 3.0% in 2023 from 3.5% in 2022, following a slight upward revision relative to earlier April forecasts as a reflection of the complex evolution of economic conditions in 2023 relative to 2022. On the one hand, many of the forces that weighed on growth in 2022 are still present in 2023, including high inflation, which continues to erode the purchasing power of consumers around the world, and the consequent monetary-policy tightening, which led to rising borrowing costs, a bout of banking turmoil earlier in the year and more onerous debt burdens which threaten to crowd out public investment in many developing countries.

Nonetheless, major drags on growth in 2022 finally relented in 2023, with adverse effects from the COVID-19 pandemic and related supply-chain disruptions largely subsiding, most notably in China, and supply and delivery times returning to normalcy. The modest slowdown in economic recovery is most notable in the case of advanced economies, where growth is expected to decline from 2.7% in 2022 to 1.5% in 2023, largely due to developments in the United States, the European Area and the United Kingdom. On the other hand, growth in emerging markets and developing economies (EMDEs) is expected to remain constant at 4.0% in 2023, the result of post-pandemic expansion in China, offsetting slower growth expected elsewhere.

Looking ahead, growth prospects for 2024 are predicted to remain flat at 3.0%, owing to a balance of upside and downside risks. In spite of possible positive growth surprises, plausible risks to the outlook include possible inflation resurgence, early signs of underperformance in China's economic recovery, the continuance of debt distress in many economies and the economic fallout from deepening geopolitical fragmentation.

Growth prospects for major economies in the Pacific region such as Australia and New Zealand are also

expected to dwindle in 2023 and 2024. Growth for Australia is anticipated to decline from 3.7% in 2022 to 1.6% in 2023 and to 1.3% in 2024, whereas economic expansion in New Zealand is forecast to slow to 1% in 2023 and 1.2% in 2024, from 2.1% in 2022.

Global commodity prices

The IMF's primary commodity price index dropped to 165 points in the second quarter of 2023 from 175 point in the first quarter, driven by an 11% quarter-on-quarter decline in energy prices to 181 points and a marginal 1% fall in non-energy prices to 153 points. The decline in both energy and non-energy prices reflects slower economic activity easing pressures on commodity markets, as a combination of high prices and rising borrowing costs constrained consumers and businesses. An exception to this downward trend is marked by food prices, which rose by 1.7% to 142 points in the second quarter of 2023.

Global inflation

Following a slight downward adjustment relative to the April projection, global inflation is estimated to ease to 6.8% in 2023 from the 8.7% peak recorded in 2022, largely due to the rounds of monetary policy tightening taken by central banks to bring prices back under control. The retreat in inflation has been particularly pronounced in advanced economies, where inflation is projected to fall by 2.6 percentage points to 4.7% in 2023 on the back of declines in energy and food prices and the build-up of oil and gas inventories in Europe. Inflation in EMDEs is also anticipated to decline, from a high of 9.8% in 2022 to 8.3% in 2023, following weaker-than-expected demand in China. However, inflation is likely to remain high overall, given the impacts of a possible intensification of the war in Ukraine on food and fuel prices and the adverse effects of climate change. Regionally, inflation for Australia and New Zealand fell to 6.0% each in the second quarter of 2023 from 7.0% and 6.7% respectively in the March quarter following higher rental cost and international holiday travel and accommodation.

CHAPTER III: DOMESTIC ECONOMY

Overview

Overall real domestic economic activity in Solomon Islands weakened slightly in the June 2023 quarter compared to the previous quarter. This was driven by lower production in key agricultural commodities as well as in the logging and fishing industries. Other indicators such as consumption imports also fell indicating slower activity in the wholesale and retail trade sectors, while cement imports experienced a significant drop as major construction projects, such as the sports facilities intended for the Pacific Games, reached their concluding stages. Meanwhile, mining, electricity production, and manufacturing activity all reported an increase whilst conditions in the labour market improved. Inflation, while still elevated, eased over the quarter in line with a decline in international crude oil prices.

Production Index

The production index, which tracks developments in the country’s major export commodities, contracted in the second quarter of 2023 by 1% to an index of 118. This outcome mirrored a decline in round logs by 7%, fishing by 8% and agriculture cash crops by 4% which outweighed the upturn recorded in mining. On an annual basis, however, the production index was 24% higher than in 2022.

Forestry

Log production fell by 7% this quarter to 404,227 cubic meters (m3) mainly driven by the downturn in natural logs by 9% to 372,526 m3 against a 13% growth in plantation logs. On a year-on-year basis, log production was up by 39%.

A breakdown of log production by Province shows that Guadalcanal remained the primary source, with a 29% share of total production, followed by Western’s 26%, Isabel’s 16%, Makira’s 13%, Malaita’s 9%, Temotu’s 4% and the 2% contribution from each of Choiseul and Rennel and Bellona (see Figure 3.3).

Meanwhile, the average export prices for round logs went down by 2% to US\$102 per m3, and the global log price indicator, likewise, edged down by 4% to US\$217 per m3 against US\$225 per m3 in the previous quarter.

Fishing

Fishing activities remained weak in the three months to June, with the total fish catch falling by 8% to 6,174 tons. This outcome was attributed in part to changing weather conditions and to a lesser extent minor maintenance work being carried out on some fishing vessels, leading to the fleet spending a greater number of days at port instead of out fishing. However, an

¹ Agricultural crops combined palm oil, copra, coconut oil, and cocoa.

annual comparison, reveals that fish catch was higher by 4% this quarter (see Figure 3.4).

Despite the slowdown in overall fish catch, tuna value-added output recorded an upturn across a range of tuna products during the quarter. Production output for canned tuna of which 20% was destined for domestic consumption and 80% was exported-increased by 25% to 1,947 tons, loin production surged by 33% to 9,324 tons and fishmeal output rose from 418 tons to 696 tons, owing to higher demand from trading countries. This occurred against the backdrop of a 4% growth in the average global fish price, to US\$2,007 per ton from US\$1,931 per ton in the previous quarter.

Palm Oil

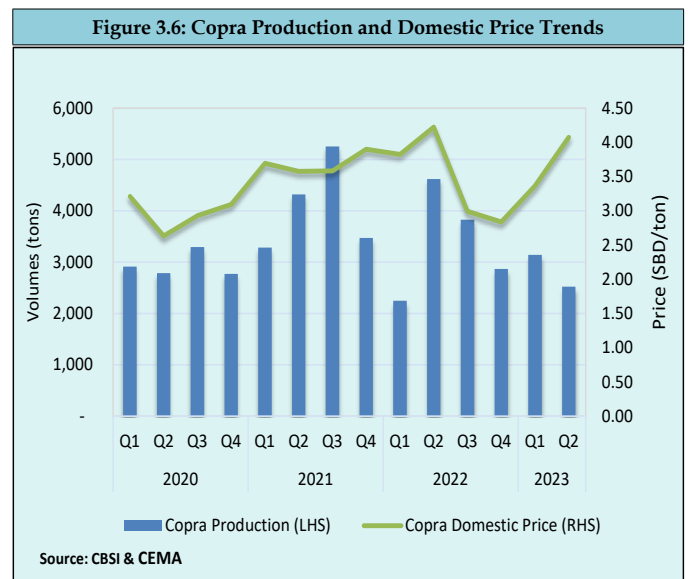

Palm oil production deteriorated this quarter with lower outturns recorded across all palm oil products. The volume of harvested fresh fruit bunches plummeted by 4% to 29,607 tons from 30,681 tons in the previous quarter, whereas, crude palm oil edged lower by 8% to 6,733 tons and palm kernel oil by 9% to 670 tons.

The average international prices of crude palm oil and palm kernel oil edged down by 4% and 7% to US\$919 per ton and US\$979 per ton, respectively over the same period. Similarly, the contracted price for crude palm oil fell by 7% to US\$1,076 per ton while the contracted price for palm kernel oil, in contrast, rose from US\$819 per ton to US\$1,252 per ton.

Copra and Coconut Oil

Copra output slowed during the quarter by 20% to 2,524 tons against 3,143 tons in the March quarter (see Figure 3.6). As a consequence, coconut oil production dwindled by 8% to 1,185 tons and 16% below the same quarter in 2022.

The provincial distribution showed that Central province accounted for the largest share at 30%, followed by Choiseul with 23%, Western represented 19%, while Malaita, Guadalcanal, Makira, Isabel and Temotu provinces contributed towards the remaining share of 28%.

In terms of prices, the average contracted price for

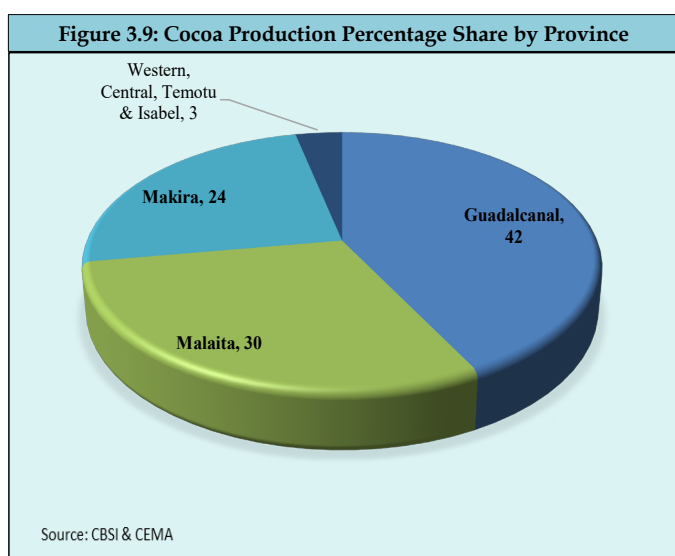

copra dropped from US\$506 per ton to US\$435 per ton, whereas the domestic copra price, however, rose by 21% to \$4.07 per kilogram. Furthermore, the contracted price for locally produced coconut oil improved by 9% to US\$1,050 per ton and the average international price for coconut oil, on the other hand, declined by 4% to US\$1,045 per ton.

Cocoa

Cocoa production rose from 511 tons to 765 tons this quarter (see Figure 3.8). The higher outcome reflected peak harvesting season for cocoa. Conversely, this production level was 38% lower compared to the same quarter a year ago owing to unfavourable weather conditions.

In terms of production by provinces, Guadalcanal contributed 42% of the total output, followed by Malaita with 30%, Makira 24% and the remaining 3% came from Western, Central, Temotu and Isabel provinces (see Figure 3.9).

Meanwhile, the average international price for cocoa

edged up by 12% to US\$3,003 per ton from US\$2,673 per ton. Similarly, the average contracted price exporters received rose by 11% to GBP1,900 per ton and the domestic cocoa price our farmers received increased from \$12.90 per kilogram to \$14.18 per kilogram this quarter.

Mining

Developments in the mining sector expanded in the June quarter of 2023. Mineral output increased from 13,635 equivalent units of gold ounces to 18,972 equivalent units of gold ounces in the June quarter. The output level was almost five-folds higher on a yearly comparison. The formal employment in the mining sector expanded by a total of 76 SINPF contributors, indicating strong activities in the mining sector. In terms of prices, the average international gold price went up by 5% to US\$1,978 per ounce from US\$1,889 per ounce in the last quarter.

Manufacturing

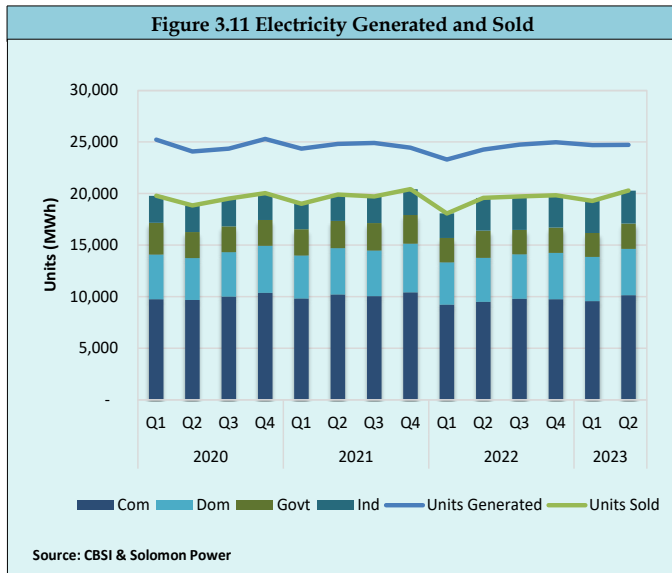

Activities within the manufacturing sector, proxied by the manufacturing index, bounced back by 38% to 325 points from 235 points in the preceding quarter (see Figure 3.10). Similarly, the manufacturing index was up by 4% on a year-on-year comparison. The improvement was noticeable for both the goods produced for domestic consumption and those for exports. The manufactured goods for domestic consumption soared by 51% to 161 points driven by higher output in biscuits, tobacco, beverages and canned tuna products. Likewise, goods produced for exports, increased by 32% to 670 points driven by improved canned tuna and loins production.

Electricity and Water

Electricity production grew slightly from 24,707 Megawatts hour (MWh) to a total of 24,718 Megawatts hour (MWh) in the June quarter while sales rose 5% to 20,294 MWh. The rise in electricity sales stemmed from an increase across all user categories with a sizeable expansion in commercial customers by 560 MWh, followed by domestic customers which surged by 217

MWh, Government users which rose by 154 MWh, and industrial customers that increased by 89 MWh. The state-owned electricity producer experienced mechanical issues with some of its gensets in Honiara in May and was consequently forced to ration the supply of electricity through a load shedding schedule. This has had an impact not just on electricity sales especially in the month of June but also on efficiency in business activities more generally.

Meanwhile, electricity tariffs dropped for all customer categories by an average of 71 cents per KWh relative to the previous quarter. The tariff for domestic customers dropped by 70 cents per KWh to \$7.09 per KWh whereas that for both commercial and industrial customers fell by 71 cents each to \$6.55 per KWh and \$6.40 per KWh respectively.

Data on commercial water consumption for the second quarter of 2023 is not yet available at the time of publication, but it should be noted that the water tariffs remained unchanged in the quarter to June.

Construction

Construction activities weakened in the second quarter of 2023 following the completion of some major facility projects geared towards the Pacific Games, even though construction on related road, water and sanitation projects continued. The slowdown was reflected in the volume of cement imports, a partial indicator for construction, which declined by 104 points to an index value of 120. However, lending to the construction sector expanded by \$28 million while the number of SINPF contributions from the sector increased by 62 contributors, implying that construction work continues even upon completion of key Pacific Games facilities. Building permits data in the Honiara City zone under the Honiara City Council was not yet available at the time of publication.

Communication

Statistical data on internet and mobile usage has not yet

been made available by telecommunication regulator. However, from CBSI's recent Business Perception survey for the month of July, telecommunication providers have indicated that both internet and mobile usage slowed in the first half of the year. At the same time, the number of SINPF contributions in the communications sector increased by 22 contributors to a total of 1,572 contributors while commercial bank loans to this sector declined by 10%.

Tourism

Visitor arrivals rebounded by 3% to 4,000 visitors (provisional) in the three months to June compared to 3,900 visitors recorded in the March quarter of 2023. Furthermore, four international cruise ships docked in Honiara in the second quarter alone. SINPF contributions to the tourism sector also witnessed an increase of 79 contributors which reflected an expansion in tourism services.

Foreign Investment

During the quarter, the number of new foreign investment applications approved by the Foreign Investment Board within the Ministry of Commerce, Industry, Labour and Immigration increased to 19 applications from a total of 16 applications in the previous quarter. The services sector accounted for 9 applications comprising of new applications for consultancy services, electrical, wholesale and retail, transport and communication, and all other services. The number of applications from the secondary sector including mining, manufacturing and construction stood at 6 while the primary sector saw 4 applications approved for fisheries and agriculture. Meanwhile, the total estimated value of investment indicated by the foreign investors dropped from \$498 million in March to \$431 million in the June quarter.

Wholesale and Retail

Activity within the wholesale and retail trade sector posted mixed movements. Imports of food and beverages index, a partial indicator for wholesale and retail trade dwindled by 48% to 62 points against 120 points in the preceding quarter owed to high international food prices. On the other hand, the total number of SINPF contributions from the sector rose by 406 contributors to a total of 13,954 contributors, and the commercial bank lending to the sector grew to \$642 million from \$633 million in the previous sector.

Labor Market and Employment

Labour market conditions remained soft in the June quarter. SINPF's number of contributions (active and slow active), a proxy for formal employment recorded a minimal uptick of 0.8% to 55,379 contributors from 54,963 contributors. Similarly, vacancy advertisements through the Pasifiki HR services increased by 45% to 537 advertisements from 370. Pay As You Earn (PAYE) tax in nominal terms, another partial indicator for employment conditions, however, decreased by 4% to \$121 million in the June quarter.

Inflation

The consumer price index (CPI) for the June 2023 quarter declined to an index of 118.7 from an index of 119.3 recorded in the March 2023 quarter. The quarter-on-quarter movement reflected price drops in electricity, fruits, narcotics (betel-nuts), and medical-related products.

Headline inflation in June eased to 4.3% from 8.2% in previous quarter, driven by a fall in both the imported and domestic components of inflation. Imported inflation fell from 8.2% to 2.5% with a significant reduction in transportation reflecting the fall in world crude oil prices. Similarly, domestic inflation dropped from 8.3% to 5.0%, a decline attributable to a more limited upward movement in the overall prices of food and tobacco.

was seen in the rates for transport and the food categories. Inflation in Honiara eased from 9.0% to 5.4% quarter-on-quarter, whereas in Gizo, it moved from 9.5% to 4.0%, in Noro from 5.1% to 2.3%, and in Auki from 7.5% to 4.3%.

Core inflation slowed to 5.3% from 7.5% although the rate remained high suggesting persistence underlying price pressures in the economy.

Prices came down across all four townships considered, albeit with different magnitudes. A notable reduction

CHAPTER IV: BALANCE OF PAYMENTS

Overview

Solomon Island's overall Balance of Payments (BOP) position posted a provisional surplus of \$152 million in the June quarter of 2023, reversing a deficit of \$26 million recorded in the previous quarter. This favorable outcome reflected the improvement in the current account deficit combined with the increased surpluses in the capital and financial accounts. As a result, the gross foreign reserves rose by 2% to \$5,582 million at the end of the quarter, sufficient to cover 11.4 months of imports of goods and services.

r - revised

Source: CBSI

Trade in Goods

The trade in goods balance improved significantly over the three months to June 2023 to a narrower deficit of \$44 million following a revised deficit of \$269 million recorded in the previous quarter. This positive outcome stemmed from a 9% increase in exports to \$993 million against a 12% decline in imports to \$1,036 million during the review period.

The growth in exports was driven by higher receipts on minerals, fish, 'copra & coconut oil' and other exports. Mineral exports surged by 21% to \$314 million owing to higher production and shipments of gold commodities (gold equivalent units and alluvial gold) during the quarter. Fish exports more than doubled to \$201 million reflecting higher production volume, particularly for canned tuna and tuna loins, and favourable market prices over the three months to June 2023. Similarly, 'copra & coconut oil' increased

from \$14 million to \$19 million whilst other exports went up to \$11 million from \$7 million in the March quarter. Meanwhile, round log exports contracted by 16% to \$318 million reflecting lesser logging activities during the period. Likewise, palm oil fell by 11% to \$88 million and cocoa dropped from \$15 million to \$11 million as a result of lower production, while timber exports dropped from \$36 million to \$16 million during the quarter.

The decline in imports was attributed to the reduction across major import categories during the period. Fuel imports dropped by 37% to \$208 million owing to bulk imports in the preceding two quarters as well as easing international oil prices. Machinery & transport equipment contracted by 21% to \$242 million and food imports slid by 0.4% to \$248 million during the quarter. Similarly, 'beverages & tobacco' reduced from \$17 million to \$14 million, animal & vegetables oils dropped to \$12 million while miscellaneous items fell to \$84 million. On the other hand, basic manufactures increased by 14% to \$253 million, chemicals rose by 4% to \$89 million, and crude materials went up by \$4 million to \$12 million against the previous quarter.

Trade in Services

Trade in services balance recorded a lower deficit of \$218 million this period from a revised \$254 million deficit in the March quarter of 2023. This improved outcome emanated from the reduced deficits in transport and all other services which outweighed the wider deficit in travel service this quarter. The deficit in transport services narrowed from \$71 million to \$46 million over the three months to June driven by higher receipts on air passengers combined with lower payments on sea and air freights. Similarly, the deficit in all other services narrowed from \$135 million to \$114 million due to lower payments for insurance, financial, construction, and other business services this

period. On the other hand, the deficit in travel services widened to \$65 million from a revised \$48 million deficit in the preceding quarter as a result of higher payments on personal travel during the quarter.

Primary Income Account

The primary income balance posted a deficit of \$41 million in the June quarter of 2023, reversing a \$50 million surplus recorded in the preceding period. This negative outcome was mainly driven by the wider deficit in the net investment income along with the reduced surplus in other primary income. The net investment income deficit widened to minus \$112 million from minus \$14 million in the March quarter largely owed to higher dividend payout despite the increase in reserve assets during the review period. Likewise, other primary income net fell by 14% to \$44 million attributing to the reduction in fishing licenses receipts. Meanwhile, the net surplus in compensation of employees¹ more than double to \$27 million from \$12 million posted in the March quarter reflecting higher receipts from the growing number of Solomon Islands' seasonal workers abroad.

Secondary Income Account

The surplus in the secondary income account plunged by 35% to \$144 million in the second quarter of 2023, and 59% below the same period a year ago. The reduced surplus was due to the reduction in net transfers to both the general government and the private sector during the three months to June. Net government transfers dropped by 37% to \$100 million surplus reflecting lower donor inflows in the form of short-term technical assistance and aid-in-kind received during the quarter. Furthermore, net transfers to the private sector contracted by 30% to \$44 million as a result of higher outward remittances by foreign workers residing in Solomon Islands outweighing the remittance inflows from Solomon Islanders working abroad. The reduction in inflows from Churches and other private transfers also contributed to this outcome.

Capital Account

The capital account surplus expanded to \$360 million this period from \$217 million recorded in the March quarter. This favourable outcome was mainly driven by the surge in donor support in the form of capital grants and long-term technical assistance towards the government's capital projects including the completion of the key facilities for the Pacific Games and the ongoing construction of other key infrastructures such as roads and bridges around the country.

Financial Account

The financial account surplus increased in the June quarter to \$129 million following a \$93 million surplus

in the previous period. This outcome reflected the positive turnaround in foreign direct investments (FDI) combined with a reduced deficit in portfolio investments during the quarter. FDI inflows rebounded to a surplus of \$104 million from a \$47 million deficit in the previous quarter as a result of the increase in equity shares, higher reinvested earnings and inter-company lending. In addition, the deficit in portfolio investment narrowed to \$7 million from \$12 million in the March quarter. On the other hand, other investment surplus contracted significantly to \$36 million over the three months to June 2023 from \$157 million in the last period reflecting lesser external borrowing by the government and private sector combined with the reduction in commercial banks' holdings of foreign currency during the quarter.

Gross Foreign Reserves

The country's gross foreign reserves grew by 2% to \$5,582 at the end of June quarter. The growth in reserves reflected the overall BOP position (net inflow) of \$152 million attributed to higher inflows. In terms of US dollar (USD), this level of reserves is equivalent to US\$667 million, sufficient to cover 11.4 months of imports of goods and services.

International Investment Position (IIP)

The net IIP posted a wider deficit of \$1,249 million this period from \$1,226 million deficit in the previous quarter (See Table 4.2). This was attributed to a 2% decline in the stock of financial liabilities to \$8,361 million against a 2% growth in the stock of financial assets to \$7,112 million during the review period.

Table 4.2 International Investment Position (\$ million)					
	2022		2023		% changes
	Q3r	Q4r	Q1r	Q2p	
Net IIP 1/	-855	-915	-1,226	-1,249	2%

Exchange Rate

On a quarterly average basis, the Solomon Islands dollar (SBD) depreciated against the United States dollar (USD) by 0.7% to \$8.34 per USD in the second quarter of 2023. However, the SBD appreciated against the Australian dollar and the New Zealand dollar by 1.8% to \$5.57 per AUD and 1.2% to \$5.16 per NZD, respectively over the period. Similarly, the SBD strengthened against the Japanese Yen by 3.1% to \$6.08 per JPY, however, it depreciated against the British

Pound and the Euro by 3.5% to \$10.43 per GBP and 2.1% to \$9.08 per EUR, respectively during the quarter.

In terms of the trade-weighted index (TWI), the SBD weakened by 1.1% to a quarterly average of 114.1 points in the June quarter. Meanwhile, the nominal effective exchange rate (NEER) and the real effective exchange rate (REER) both appreciated by 0.8% to an index of 120.5 and 133.8 respectively during the period. The appreciation of the REER reflected the strengthening of the SBD against some of the bilateral trading currencies as well as the inflation differentials between Solomon Islands and its trading partners over the review period.

CHAPTER V. MONEY AND BANKING

Monetary Developments

Monetary conditions moderated from the favorable balance of payments and positive movements in lending during the quarter. Key indicators on reserve money (M0), narrow money (M1), broad money supply (M3), liquidity, and credit to the private sector, all indicated increases. The weighted average interest rate margin widened further during the quarter.

Reserve Money

Reserve money (M0) saw a 2% increase, reaching a total of \$4,029 million at the end of the June quarter of 2023, following the 2% decline seen in the previous quarter. The rise in M0 was primarily due to a 2% increase in both the currency in circulation and the ODCs call balances held at the Central Bank to \$1,242 million and \$2,783 million, respectively.

On the sources side, the growth in M0 was influenced by CBSI's net foreign assets (NFA), which increased by 3% to \$5,091 million, combined with the widening of CBSI's net domestic assets (NDA) by 6% to minus \$1,056 million. The increase in CBSI's net foreign assets was attributed to higher inflow receipts, while the expansion of CBSI's net domestic assets was due to the rise in government deposits held at CBSI.

Figure 5.1 Major Drivers of Reserve Money

Broad Money

Broad money supply (M3) increased by 0.1% to of \$5,690 million during this current quarter, following a decline of 2% recorded in the previous quarter. The increase stemmed from a marginal increase in narrow money (M1), despite a fall in other deposits (time & savings). Year-on-year growth, saw M3 increase by 5%.

M1, which constitutes 82% of M3, rose by 0.2% to \$4,652 million during this period. This was due to a 2% increase in the amount of currency in active circulation to \$1,166 million. However, transferable deposits declined by 0.3% to \$3,486 million during the same period. (See Figure 5.2).

Other deposits, which constitute 18% of M3, declined by 1% to \$1,038 million at the end of this quarter. The fall was attributed to the reduction in other deposits of other financial corporations by 5% to \$534 million.

In terms of source, the upward movement in M3 was attributed particularly to the rise in the NFA of the banking system by 2% to \$5,354 million. Whilst there is a reduction in the NDA of the banking system by 19% to \$399 million. The positive movements in the NFA were associated with higher inflow receipts and favorable changes in the balance of payments, resulting in a surplus. The contraction in NDA primarily stemmed from a decrease in net domestic credit during the quarter.

Figure 5.2 Components of M3

Liquidity

Total liquidity of the banking system grew by 2% to \$2,783 million in the second quarter of 2023, after a 1% decline in the first quarter. This positive trend was supported by a 3% increase in the NFA, reaching \$5,091 million. Subsequently, free liquidity expanded by 1% to \$2,420 million despite a 0.4% dip in excess liquidity, which settled at \$2,056 million during the review quarter. (See Figure 5.3).

Figure 5.3 Commercial Banks' Liquidity

Domestic credit

Net domestic credit (NDC) of the banking system declined by 6% in June 2023 to \$1,898 million, following a 3% decline in March 2023. The decline in NDC was driven by a 27% growth in net credit to central government (NCG) to minus \$830 million. The expansion in NCG was primarily due to the accumulation of government deposits within the banking system. On the other hand, credit to the private sector (PSC) recorded a 2% growth to \$2,719 million in the review quarter. The growth in PSC stemmed from loans issued by ODCs to other nonfinancial corporations as well as loans granted to other resident sectors.

Total credit issued by the ODCs to sectors of the economy grew by 2% to \$2,615 million. Sectors that contributed to the growth were personal loans which increased by 1% to \$980 million; distribution by 1% to \$642 million; construction by 9% to \$344 million and transport by 2% to \$135 million.

In contrast, sectors that contracted during the quarter were manufacturing by 5% to \$106 million, professional and other services by 6% to \$99 million, and communication by 10% to \$63 million. Proportionally, personal loans held the largest share of loans & advances at 37%, followed by distribution at 25%, construction at 13%, and the remaining sectors with less than 10% each. (See Table 5.1)

Sectors	2022			2023		% Share
	Q2	Q3	Q4	Q1	Q2

Source: CBSI

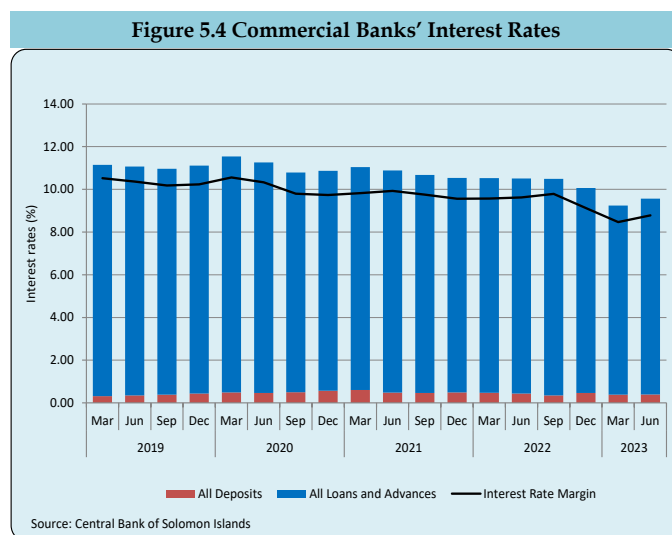

Credit facilities issued by the ODCs saw lease financing decline by 10% to \$7 million while overdrafts and loans

recorded increases by 3% to \$293 million and 1% to \$2,315 million, respectively, during the review quarter. (See Table 5.2)

Type	Mar-22	Jun-22	Sep-22	Dec-22	Mar-23	Jun-22
Over drafts	268	279	287	295	284	293

Total credit (excluding trade bills)	2,505	2,524	2,555	2,557	2,575	2,615

Source: CBSI

The weighted average interest (WAI) rate margin for the ODCs expanded to 8.69% from 8.47% in March 2023. This resulted from the WAI rates for deposits remaining unchanged at 0.39% while the WAI for loans increased from 8.86% to 9.08% from the previous quarter. The widening of interest rates for loans and advances came from an increase in the WAI for a few sectors including agriculture moving from 11.21% to 11.96%, forestry from 10.85% to 10.87%, distribution from 8.09% to 8.21%, entertainment and catering from 9.98% to 10.04% and transportation from 10.20% to 10.21%. At the same time, some sectors saw a decline in the WAI such as fisheries from 17.07% to 16.52%, personal from 9.70% to 9.48%, professional and other services from 8.53% to 8.40%, and construction from 8.73% to 8.64%.

Other Financial Corporations

The NFA of other financial corporations (OFCs) increased by 3% to \$385 million in the second quarter of 2023 compared to the 2% rise in March 2023. The driving factor behind this increase was a 6% expansion in foreign assets, reaching a total of \$428 million. The growth in foreign assets came from the higher holdings of shares by non-residents and an increase in other deposits of non-residents denominated in foreign currency.

Meanwhile, net domestic assets of OFCs contracted by 2% this quarter to \$3,298 million. This mirrored a 31% increase in capital accounts to \$544 million, reversing growths in NDC by 3% to \$3,149 million and a 0.02% uptick in other items net to \$693 million. Growth in NDC reflected a 1% increase in PSC to \$1,609 million, particularly driven by loans issued to other nonfinancial corporations by 9% to \$223 million. Additionally, NDC growth came from net credit to the nonfinancial public sector, growing by 15% to \$648 million. On the other hand, NCG has strengthened during the quarter, experiencing a 25% increase to reach \$421 million.

Monetary Policy Operations

In light of the expected global economic recovery, a resurgence in domestic demand from the Pacific

Games, and the persistently high levels of price index in the economy, CBSI maintains monetary tightening in the next six months to contain inflation. CBSI will remain vigilant in observing new data and will take appropriate action if necessary.

In the domestic securities market, the stock of CBSI Bokolo bills stood at \$403 million at the end of the June quarter, with a weighted average rate of 0.24%. Likewise, the stock of auctioned treasury bills recorded \$131 million. The WAI offered for 91-day bills recorded 0.50% from 0.49%, while, the WAI for both 182 days and 365 days bills increased from 1.26% to 1.77%, and from 2.01% to 2.10% to 2.01%, respectively.

CHAPTER VI. GOVERNMENT FINANCE

The Government registered a wider deficit of \$515 million in the second quarter of 2023 from a \$36 million deficit in the March quarter reflecting higher expenditure pressures amidst weaker revenue collections. In line with the higher deficit, the Central Government debt stock increased further following incurrence of new borrowing to finance key infrastructures and urban water projects.

Revenue

Total revenue collection improved slightly by 2% to \$771 million against the March quarter of 2023. This outcome was attributed to higher proceeds collected from non-tax revenue despite lower collection on grant receipts, while tax revenue remained the same as in the previous quarter. Nevertheless, total revenue was below the budget by 4%, and 15% lower when compared to the same quarter last year. Disaggregating total revenue by percentage share, tax revenues represented 88%, non-tax revenue with 9% and grants constituted the remaining 3%.

Taxes

Tax revenue remained broadly the same as in the March quarter of 2023 at \$679 million, stemming from declines in tax on international trade and goods and services taxes, which outweighed an increase in taxes on income and profits. However, tax revenue was 9% higher than the corresponding quarter a year ago.

Tax on international trade contracted by 2% to \$274 million against the preceding quarter. This mirrored an 11% downfall in export duties to \$82 million, negating an improvement in import duties by 3% to \$192 million. Meanwhile, tax on international trade was above the level of the same quarter last year by 32%, and represented 40% of total tax revenue.

Tax on goods and services fell by 3% to \$160 million in the June quarter of 2023, and 5% lower against

the same quarter in the previous year. The negative outturn emanated from reductions in registrant goods tax and excise duties, the former by 1% to \$76 million and the latter by 14% to \$52 million. Meanwhile, this tax category accounted for 24% of total tax revenue.

However, tax on income and profits, which contributed 36% of total tax revenue, improved by 4% to \$246 million against the preceding quarter. This stemmed from an increase in company taxes by 13% to \$125 million, due to strong collections on withholding tax and company provisional taxes. Conversely, personal income tax dwindled by 4% to \$121 million during the quarter.

Grants and Non-tax Revenue

Donor receipts dropped further by 30% to \$25 million in the second quarter of 2023, and 85% lower compared to the same quarter in the prior year. The unfavorable result reflected fewer grant receipts obtained from donor partners. Meanwhile, non-tax revenue from line Ministries rebounded to \$67 million from \$39 million in the preceding quarter. This was driven by higher proceeds collected from fishing licenses, despite downturn in administrative-related fees.

Expenditure

Total government expenditure surged by 63% to \$1,287 million in the second quarter of 2023, reversing the downward movement posted in the prior quarter. The increase in total expenditure reflected rises in both the recurrent and capital expenditures. Recurrent spending went up by 29% to \$992 million and development expenditure increased from \$21 million to \$295 million. Similarly, total government expenditure exceeded the budget and the corresponding quarter of 2022 by 11% and 31%, respectively.

Recurrent Spending

The 40% upsurge in operating costs, which comprised payroll and purchase of goods and services, were the major drivers behind the growth in recurrent expenses. Payroll grew by 10% to \$409 million, owing to a rise in delayed rental payments which is treated as benefits to public servants. Purchases of goods and services expanded to \$426 million from \$225 million in the preceding quarter, driven by increased spending on training related costs and consumables. Total recurrent expense was 9% higher compared to the same quarter a year ago.

Benefits and Transfers

Benefits and other transfers, on the other hand, dropped by 10% to \$147 million, due to declines in grants transfers to both other levels of government and private sector. Nevertheless, benefits and other transfers was 31% above the similar period of 2022.

Acquisition of Nonfinancial Assets

The upturn in development outlays was largely driven by the government’s continuous spending on capital projects, some of which is related to the Pacific Games preparation in the capital for road upgrade and rehabilitation, and improvement on water supply and sanitation.

Debt Stock and Servicing

Total government’s debt stock rose by 5% to \$2,316 million in the June quarter of 2023, due to increases in both the external and domestic debt components.

External debt grew by 3% to \$1,392 million, attributable to additional loans from ADB and the World Bank. Domestic debt expanded by 10% to \$924 million, largely driven by a \$42 million development bond issued to SINPF, and auctioned treasury bills of \$40 million. In terms of the composition of the total debt stock, external debt constituted 60% and domestic debt 40%. By proportion of external debt in foreign currency, 69.3% was denominated in SDR, USD 19.7%, Yen 10.7%, and Euro 0.3%.

Debt servicing in the June quarter totaled \$52 million, 2% lower compared to the debt payments made in the first quarter of 2023. The debt servicing consisted of \$42 million in principal repayments and \$10 million in interest charges. Meanwhile, for debt sustainability indicators, the debt-to-GDP ratio grew from 18% in the preceding quarter to 19%, while debt service-to-domestic revenue fell to 7% from 10% in the March quarter and debt service-to-exports of goods and services contracted from 7% to 4%.

Expenditure by Functions of Government

The government spending by functions from provisional data available are estimated as follows, education represented 25%, economic affairs 23%, general public services 22%, health 12% and others, which consisted of public order and safety, recreation, culture and religion, environmental protection, housing and community amenities, and social protection, accounted for 18%.

Information box: Snapshot of SIG Debt Five-Year Trends and Composition

This analysis provides a short summary of the SIG debt development from 2019 to 2023. Over the five years, debt has been accumulated from 9% to 19% of GDP following new borrowings largely for infrastructures. The four charts below provide insights into debt accumulation.

The pace of increase in external debt over five (5) years period, as illustrated in figure 1, was largely driven by additional borrowings from multilateral creditors and new loan from a bilateral creditor, namely, JICA. Accordingly, in Figure 1, the external debt to GDP ratio sharply increased from 6% in 2019 to 11% in June 2023. The pie chart in Figure 2, further displayed the percentage share of total foreign debt, of which the multilateral creditors like ADB and World Bank represented bulk of the external debt.

During the five (5) years period, the growth trend of domestic debt in Figure 3, was largely driven by the COVID-19 development bonds that the Government issued locally. The domestic bonds accounted for largest share of total domestic debt at 85% as reflected in Figure 4.

These charts have visually depicted that both the external and domestic debt stocks have notably increased from 2019 to the first half of 2023, and expected to increase further due to major pipeline projects and upcoming government priorities for 2023 and in the medium term.

* This figures have been updated based on the new HCPI series 3. The new Index Reference Period is 2017 = 100.

NOTES TO STATISTICAL TABLES

Table 1.1a & 1.1b **Depository Corporations Survey**

The Depository Corporations Survey (DCs) is derived from the Central Bank Survey (Table 1.2) and Other Depository Corporation Survey (ODCs) – (Table 1.3).

Table 1.2a & 1.2b **Central Bank Survey**

The Central Bank Survey is derived from the assets and liabilities of the Central Bank of Solomon Islands (CBSI) which is based on the CBSI's monthly trial balance.

Table 1.3a & 1.3b **Other Depository Corporations Survey**

The Other Depository Corporation survey is derived from the monthly assets and liabilities of the Commercial Banks, Credit Corporation and Credit Unions.

Table 1.4a & 1.4b **Sectoral Distributions of Other Depository Corporation Credit Outstanding**

Loans and advances are classified by sector according to the main economic activity of the borrower and are compiled from the monthly returns submitted by commercial banks.

ODCs Credit Outstanding includes credit issued from the commercial banks, credit corporations and credit unions to private sector excluding lending to non-financial public sector.

Table 1.5 **Other Depository Corporations Liquid Assets Position**

The data are derived from the balance sheets of the banks.

Commercial banks are required to hold a percentage of total deposit liabilities in the form of liquid assets, as determined by the Central Bank. The surplus/deficit position shows the excess shortfall of liquid assets holdings over/ below the statutory required level.

Table 1.6 **Other Depository Corporations Clearing**

This table presents data on the total number and average value of cheques cleared by commercial banks at CBSI on a monthly basis.

Table 1.8 **Value of Currency in Circulation by Denomination**

This includes notes and coins by denomination.

Table 1.12 **Assets and Liabilities of Credit Corporation of Solomon Islands**

All lending is in motor vehicles for both private and businesses. The term deposits, most by NPF, are for terms 6 months and 4 years.

Table 1.13a & 1.13b **Assets and Liabilities of the Solomon Islands National Provident Fund**

The major components of the assets is in commercial banks term deposits.

Table 1.14 **Balance of Payments & International Position Statistics Summary**

The format of this table is broadly consistent with the International Monetary Fund (IMF) standard analytical presentation. The major sources of data are the statistics Division of the Ministry of Finance, the commercial banks, the government accounts and the diplomatic offices.

In BOP concept, the surplus/deficit position in the current and capital accounts should also reflect a surplus/deficit in the financial account. Opposite positions between the current and capital accounts and the financial account reflected imperfections in available data at that time of reporting.

Table 1.19	<p>Value of Imports by Import Category The table is based on the Standard International Trade Classification (SITC) system.</p>
Table 1.20-1.22	<p>Foreign Exchange Transactions (FET) The quarterly and annual tables of foreign exchange transactions receipts and payments originate from foreign currency flows through the banking system. The commercial banks report all daily foreign currency transactions on tickets which are submitted to the International Department for collation and compilation.</p>
Table 1.23	<p>Government Securities by Holder and Instrument The government's fiscal operations as of March quarter 2015 was based on the 2001 IMF Government Finance Statistics (GFS) Framework.</p>
Table 1.25	<p>Government Revenues and Expenses Revenues comprises of tax revenue collected by Inland Revenue Division (IRD), Customs and Excise Division (CED), and non-tax revenue from other ministries and grants receive from Donor partners. The presentation is based on the IMF's Government Finance Statistic framework.</p> <p>Expenditures comprises recurrent expenses and capital related spending. Recurrent expenses include compensation of employees, purchase of goods and services, other benefits and interest payment. Capital spending relates to spending on non-financial assets such as roads and buildings. The presentation is based on IMF's GFS framework.</p>
Table 1.26b	<p>Honiara Consumer Price Index Measure consumer prices in Honiara only.</p>
Table 1.27	<p>International Commodity Prices All prices quoted are period averages. Prices quoted for fish are average prices for Yellow fin and Skipjack frozen tuna from INFOFISH Trade News bulleting published by the Food and Agriculture Organization (FAO). Price quoted for logs are from the Malaysia market.</p>
Table 1.29	<p>Production by Major Commodity Volume of major commodities classified based on the Standard International Trade Classification (SITC) system.</p>
Table 1.30	<p>Number, Value of Building Permits Issued, Honiara The data over permits issued by the Honiara Town Council for construction of buildings in Honiara only.</p>
Table 1.32	<p>Selected Economic Indicators This table brings together some of the key data reported in various tables in the Review. See notes to relevant table (s).</p>
